Professional Experience

IT Assistant

Ultec Informática – (Outsourced services)
October 2019 – April 2020

Responsible for computer assembly and repair, performing maintenance and hardware replacement.

Customer Relationship Specialist I

Atento

May 2025 – Present

Responsible for monitoring operational performance indicators for 5 teams (~80 employees), creating reports and dashboards in Excel to track KPIs, targets, productivity, and SLA.

Use of Pivot Tables, VLOOKUP/XLOOKUP, and advanced formulas for data consolidation and cross-referencing.

Performed month-over-month comparative analyses to identify trends and deviations. Developed executive presentations with performance insights, contributing to an approximate 60% increase in team performance.

Projects

Cryptography

Python

Development of a cryptography and decryption program in Python, applying basic information security algorithms, data manipulation, and programming logic.

Sorting System

Java

Development of a Java application to compare sorting algorithms (Bubble, Selection, and Merge), including execution time measurement and result validation.
