

João Gabriel Soares Barreiros

Data Analytics | Excel | SQL | Power BI | Python

Summary

Computer Science student focused on Data Analytics, BI, SQL, Python, and Power BI.

I have hands-on experience creating dashboards, automating reports in Excel/VBA, and monitoring operational KPIs. I also develop projects in Python, Java, and web development, combining programming logic, analysis, and technology.

I am seeking internship or entry-level opportunities in the Data field.

Education

Anhembi Morumbi

Jan 2025 - Dec 2028

University Bachelor's Degree in Computer Science

Skills

Data Analysis

- Excel (Advanced)
- Power BI (Intermediate)
- SQL (Intermediate)

Automation and Programming

- VBA (Intermediate)
- Python (Intermediate)
- Java (Intermediate)

Database

- MySQL (Intermediate)

Web Development

- HTML/CSS/JavaScript (Intermediate)

Analytical Skills

- Dashboard development
- KPI and SLA monitoring
- Monthly indicator analysis
- Executive reporting

Courses & Certifications

- **SQL Database** — Udemy (2026)
- **Git Complete** — Udemy (2026)
- **Python 3** — Udemy (In progress)

Professional Experience

IT Assistant

Ultec Informática

Oct 2019 – Apr 2020

Responsible for computer assembly and repair, as well as maintenance tasks and component replacement.

Customer Relationship Specialist I

Atento

May 2025 – Present

Responsible for tracking operational indicators across 5 teams (approximately 80 employees), creating reports and dashboards in Excel to monitor KPIs, targets, productivity, and SLA. Also involved in performance analysis and operational decision support.

Projects

Cryptography

Python

<https://github.com/soares-j/Cryptography>

Developed a Python program for cryptography and decryption, applying basic information security algorithms, data manipulation, and programming logic.

Sorting System Timer

Java

<https://github.com/soares-j/SortingSystemTimer>

Developed a Java system for comparing sorting algorithms such as Bubble, Selection, and Merge Sort, with execution time measurement and result validation.

WorldClicker

Java

<https://github.com/soares-j/WorldClicker>

Developed WorldClicker, an academic Java project inspired by the game Cookie Clicker, focused on object-oriented programming and graphical interface development.
