Education

Anhembi Morumbi University

Jan 2025 - Dec 2028 (In progress)

Bachelor's Degree in Computer Science

Skills

Data Analysis:

Excel (Advanced)

Power BI (Intermediate)

SQL (Intermediate)

Automation and Programming:

VBA (Intermediate)

Python (Intermediate)

Java (Intermediate)

Databases:

MySQL (Intermediate)

Web Development:

HTML/CSS/JavaScript (Intermediate)

Analytical Skills:

Dashboard creation

KPI and SLA monitoring

Monthly comparative analysis of indicators

Management presentations

Projects

Cryptography

Python

<https://github.com/soares-j/Cryptography>

SortingSystemTimer

Java

<https://github.com/soares-j/SortingSystemTimer>

WorldClicker

Java

<https://github.com/soares-j/WorldClicker>

Languages

Portuguese – Reading, Writing, and Conversation (Native)

English – Reading, Writing, and Conversation (Advanced)

Summary

I am an analytical, communicative, and adaptable professional, focused on results and continuous improvement. I have experience in monitoring indicators, data analysis, and developing reports and dashboards, always aiming to support decision-making in a clear and objective way. In addition, I have a proactive mindset to identify optimization opportunities and contribute to the management of processes and teams. Driven by my interest in technology and data, I am continuously developing in the field, with the goal of expanding my skills in analysis, automation, and programming to generate positive impact on results.

Professional Experience

IT Assistant

Ultec Informática - Out/2019 - Abr/2020

Technical Support and Service: Provided user support in resolving incidents and requests related to systems, equipment, and access, ensuring prompt service and continuity of activities.

IT Resource Maintenance and Organization: Assisted in the configuration, organization, and basic maintenance of computers, peripherals, and other technology resources, contributing to the proper functioning of the environment.

Ticket Control and Follow-up: Registered, tracked, and closed tickets, maintaining control of demands and ensuring service deadlines were met.

IT Process and Routine Support: Collaborated with the team in operational routines, supporting internal processes, activity standardization, and technology operations.

Operations Quality Analyst

Atento | May/2025 – Present

Indicators Monitoring and Management: Monitor operational KPIs, targets, productivity, and SLA, supporting results management and data-driven decision-making.

Data Analysis and Processing: Perform comparative analysis and data manipulation to identify deviations, trends, and improvement opportunities, mainly using Excel and VBA to support analysis.

Reports, Dashboards, and Presentations: Develop management reports, executive presentations, and dashboards, consolidating database information to facilitate project and operational monitoring.

Team Support and Best Practices: Contribute to aligning team priorities, sharing best practices, key points of attention, and strategic information to support management and goal achievement, which contributed to a 60% increase in results across 2 teams, with approximately 50 employees.

Courses and Certifications

SQL Database – Udemy (2026)

Git and Github– Udemy (2026)

Python 3 – Udemy (In progress)
